PROFILE

Having spent 25 years in the transportation industry where creativity, planning, and an engineering mindset are crucial to putting the puzzle together, I developed a passion for problem-solving. Being able to identify problems, break them down to their simplest form and find feasible solutions helped me thrive in my position and in my life.

When I decided to make a career change, software development appealed to me because I love to be challenged, provide solutions, and build things. Through coding, I can build just about anything from the ground up, and the ever-changing field provides me with opportunities to learn and grow every day.

PROJECTS

The Maintenance Log

<https://github.com/kellycoles/capstone>

The Maintenance Log is an app for anyone who owns anything that requires maintenance or repairs. Users can create a list of items organized by category. They can store details, notes, model numbers, and repair manuals for the items, and log all of the maintenance and repairs performed on the items. Users can access maintenance details on one item or all items. User authentication and persistent storage allow multiple users to store, create, read, edit, and delete their lists of items, and their maintenance lists.

- Built using React, CSS, and JSON server

MowPro

<https://github.com/kellycoles/capstone-back-end>

MowPro is a lawn care management application that allows users to create, read, update, and delete a list of customers, services provided, and jobs performed. It also affords users the ability to upload an image of the job site, see a dynamically generated map of the job site, and create PDF invoices and receipts for the customers, once the job is completed. Additionally, users can keep records of all jobs and sort them by customers who owe and customers who have paid. There is also a search feature that permit users to search all job records by customer name, address, email, phone number, service name, service description, and job notes.

- Built using .Net Core, Entity and Identity Framework, LINQ, JavaScript, J Query, HTML, Bootstrap 4, CSS, and SQL server

SOFTWARE EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

Full Stack Web Developer | 2019-Present

Intensive full-time 6-month software development bootcamp anchoring learning with both individual and team-based projects. Tech Stack: C#/.NET; React.js; Javascript; HTML5; CSS3; SQL

- Built single-page applications with HTML, CSS, JavaScript, and React
- Implemented CRUD principles with persistent data storage using JSON server
- Source code version control with Git/GitHub and project managing/tracking with GitHub Projects
- Applied JavaScript fundamentals leveraging DRY modular, readable code and reusable components
- Application design through whiteboarding dependencies and building ERDs
- Used Agile techniques, such as daily stand ups, code reviews, and sprints in group-based projects to simulate best on-the-job practices
- Utilized LINQ, classes, Inheritance, exception handling, and Interfaces with C#
- Executed SQL queries to extract data from SQL Server databases
- Built ASP.NET Web APIs with data annotations, and integration tests
- Built ASP.NET MVC Web Applications
- Used object/relational mapping, Entity, and Identity Frameworks

OTHER EXPERIENCE

AVERITT EXPRESS

Dock Associate | 2015-2019

- Managed the distribution of product in trailer loads to promote weight distribution for driver safety, preserve integrity of product, and deliver on time while maximizing budget
- Trained employees to use proprietary software and equipment
- Collaborated with the IT Infrastructure Team about networking issues with the WI-FI access points at the Nashville dock
- Made suggestions for improved network connectivity and interference reduction, which were implemented shortly thereafter

YRC FREIGHT

Dock Associate | 1996-2013

- Contributed to planning more efficient transport routes which resulted in increased profits by reducing fuel costs
- Member of the safety committee to aid in planning a major facility overhaul that implemented safer work practices and subsequently decreased work injuries
- Collaborated with customers about better packing solutions to ensure the package contents arrived intact with no damage
- Participated in developing an improved layout and workflow to reduce the number of times the product is handled and minimizes the chance of damage and thereby increase company profit

KELLY'S LAWN & LANDSCAPE

Owner/Operator | 2003-2011

- Provided quality lawn care and landscaping to private and commercial properties of Middle Tennessee
- Sub-contracted commercial mowing and landscape maintenance contracts
- Managed accounts payable and receivable
- Managed crews of up to 8 people
- Negotiated commercial and residential contracts
- Coordinated multiple project's schedules while factoring in the availability of workers and material, and changing weather conditions
- Compiled estimates for customers to stay within their budget
- Networked through friends, neighbors, and customers to gain business

EDUCATION

NASHVILLE SOFTWARE SCHOOL

Full Stack Web Developer | 2020

NASHVILLE STATE COMMUNITY COLLEGE

AAS Computer Information Systems | 2018
magna cum laude
